** Please note that I took maternity leave for four different years between June 1982 through January 1992 and spent many months between 1982 and the early 2000s either during the spring or fall in nutshimit. As a result, without doing alot more digging on my part it would be challenging to come up with quite specific dates for employment. I did some contracts for SIFN and for a period was employed by Canada Post for less than a year. Please ask me if you need more specific information as I will have to really concentrate to come up with a more formal resume. Lyla
