Subject: Status of Health Canada Work on Suicide

Leslie,

This is in response to a written question you left for me .

While you were away, I sent a memo to Health Canada advising them of issues and concerns I wanted them to address in the Suicide Report. They received my memo but got confused between the Comparative Health Assessment and the Suicide Report. They addressed my suicide concerns in the Comparative Health Assessment. There is probably little or no value to having them revise the Suicide Report at this time given that this error has already been made.

Joan
